ELLA BAILEY

ONE DAY ON OUR PREHISTORIC PLANET

... WITH A DIPLODOCUS

FLYING EYE BOOKS

As day breaks over an ancient continent,
a young Diplodocus walks among tangled
plants and large trees.

For the first months of her life, she has stayed safe
in the forest, hiding from hungry dinosaurs.

Now she is finally big enough to set out
and search for other Diplodocuses.
They live together in a group called a herd.

She bravely begins her journey across the vast prehistoric plains.

Along the way, she sees many wonderful things . . .
