

At first, Godfrey is just an egg floating in a pond.

But soon he develops two bright eyes.

A few days later,
he grows two
legs, perfect for
pushing off the
pond floor ...

Wow!

followed by a
pair of lovely arms
for clinging onto
lily stalks.

cool!

brilliant!

Some time after that,
he discovers that he has
a long, sticky tongue.

Finally, Godfrey hops onto a lily-pad
where the world is bright and warm.

Godfrey can't wait to see what change will happen next ...

Godfrey waits patiently, month after month.
But ...

he still just has two arms, two legs,
and a long sticky tongue.

Godfrey
is a frog.

HOW GODFREY BECAME A FROG

① Godfrey is an egg

② Godfrey is a tadpole

③ Godfrey grows legs

④ Godfrey grows arms

⑤ Godfrey's tail gets shorter (and he discovers his long, sticky tongue)

⑥ Godfrey is a frog

⑦ GODFREY IS A FROG!

cool!
